Jeff talked about the need for information on the meetings attended by board members. It should be shared with the entire board and placed on our website. Board will work at getting agendas and minutes from meetings to Jeff or Judy to be placed on the website. Jeff also stated expense reports should reflect good documentation. He said we owe it to the residents to be accountable. Jim spoke regarding board meetings and that they are a meeting of the board. Public has an opportunity to speak prior to the start of the board meeting. Once public input is closed the audience should not be participating. John stated he felt if people take the time to attend the meeting they should be allowed to speak. Jim stated public input allows that. Jeff said it becomes more of an argument/discussion and not a meeting of the board. Board briefly talked about the ARAP money the town will be receiving. No decisions made.
